Esterlam Doctor Blades

Esterlam are delighted to introduce you to the **NEW G SERIES**.

Having completed its extensive testing and market trials, the **NEW G SERIES** Esterlam Doctor Blade is inspired by our passion for delivering optimum performance and is the latest innovation to join the already globally successful Esterlam portfolio.

Designed to bring all of the improvements you demand for the very best in quality, safety and productivity and all of the additional technical benefits that all of our customers expect and value, the **G SERIES** is manufactured from a premium grade material that offers precision doctoring performance with the added benefit of up to 3 times the life of other doctor blades.

This makes the **G SERIES** our best in class of UHMW materials and allows instant start-up, job repeatability, and even longer life and safety - all the key benefits that have led major corporations worldwide to demand this exciting new synthetic blade.

G SERIES instant start-up significantly reduces material wastage improving margins on all jobs. You can also have complete confidence in handling this new blade, as with all of our Esterlam blade materials, safety is paramount and means that blade installation is quicker and safer extending faster turn around and improved productivity.

"The New Esterlam blades have been giving exceptional blade life and wearing more evenly. The new blades don't relax and keep their shape better in the chamber so less pressure is required and more consistent print achievable."
